Good anime to watch 2019 slice of life

When it comes to communication for life, we humans may think we've figured it all out, but it turns out our animal friends could teach us a thing or two about fidelity. True monogamy is rare in the animal world, but it exists among certain species. It is unclear whether or not these animals feel the love of their partners just like humans, but it is clear that for many species, forming a life-couple bond is as much about the survival of the species as it is about having someone to help build a nest and keep your feathers clean. Regardless of the cause of their monogamy, we humans can learn a lot from the devotion shown by several species of animals to our comrades. Scroll through this list to meet eight wonderful pairs of animals that mate for life. Muddy swans touch the beaks. quintessentially animal couple. (Photo: Getty Images). Two swans touch the beaks - it is a universal symbol of true love in the animal kingdom. And as it turns out, it really points to true love - or at least that's what people would call it. Swans form monogamous pairings that last for many years, and in some cases these connections can last a lifetime. Romantic? Sure, but swan couples are more a matter of survival than love. When you take into account the amount of time the Swans have to migrate, create territory, incubate, and raise their young ones, it makes sense that they wouldn't want to spend extra time attracting a new assistant each season. Arctic wolves are devoted to their comrades for life. (Photo: Getty Images). These sweaty old dogs are not as independent as you think. Lone wolf stereotypes aside, most wolf families are made up of men, women, and their puppies. Just like a human family. Alpha males share dominance in the pack with their alpha female, except for the mating season, when the alpha female is responsible for it. Bond pair of albatross takes care of his chick. (Photo: Getty Images). Many species of birds mate for life, but the albatross take things up a notch by studying advanced steps to keep the romance alive with his assistant. From a young age, albatross learn to care for their comrades using a complex preening system, pointing, crashing, bowing, and dancing. They can try these steps with many partners, but once they choose one, they are loyal companions for life. A pair of gibbons resting on a tree. (Photo: Getty Images). Gibbons are our closest animal relatives who mate with their partners for life. Men and women are about the same size, making grooming and relaxing together a comfortable fit. New research suggests that there may be some philandering going on in gibbon packs, but overall, couples stay together for life. A pair of French angel fish in the Caribbean (Photo: Getty Images). French angelic fish are very rare, if ever, alone. They form close, monogamous couples from a young age, and do everything with his assistant for the rest of his life. They live, travel and hunt in pairs and will even protect their ocean territory from pairs of fish. A pair of pigeon turtles at Kgalagadi Transfrontier Park, North Cape Province, South Africa (Photo: Getty Images). There is a good reason that tortoise pigeons come in the back two in the famous Christmas anthem, Twelve Days of Christmas. These birds mate for life. Their loyalty even inspired Shakespeare, who wrote about them in his poem Phoenix and Turtle. A family of prairie voles in their nest. (Photo: galleryhip.com). Most rodents are not monogamous by nature, but prairie voles are an exception to the rule. They form lifelong pairings with their partners and spend their lives nesting, caring, mating and supporting their comrades. In fact, they are often used as a model for true monogamous relationships in nature. Termite couple enjoys a snack. (Photo: Getty Images). When someone thinks of a faithful pair of animals, one doesn't usually call the termite species, but that's exactly what they are. Unlike ants, where the queen mates once with a male or several males before death, the termite queen mates with one termite king throughout her life. So entire colonies of termites are actually just mom dad and thousands of their offspring. av... There is no denying how popular Japanese animation has become (also called anime by fans of the genre). From its niche presence in the 70s and 80s to series like Speed Racer and Astro Boy's anime boom in the 90s with Pokemon, Sailor Moon and Dragon Ball, the anime has influenced Western pop culture and society dramatically with its quirky characters, creative worlds and original storytelling style. However, despite its popularity, there remains a stigma around Japanese animation that keeps many potential Western fans away. Many think anime is all about sex and perversion, others suggest it's hyper-violent and bloody, while some people just think the whole Japanese animation thing is too weird for their Western senses. In truth, anime can be for everyone, and there is a mountain of reasons everyone should at least give an anime series or movie a go before writing off the entire genre. Here are five of the best reasons you need to watch anime right now. KidStock/Blend Images/Getty Images There's nothing worse than getting really into an amazing animated series like Star Wars: The Clone Wars, Cor or Spectacular Spider-Man just to see it terminated after a season or two. With anime, it's not something you really have to worry about. Most popular franchises like Pokemon, One Piece and Fairy Tail have been launched for years (Pokemon has been going on for almost two decades!) and show no sign of stopping. Even when popular shows like Dragon Ball and Naruto do end they tend to have several hundred episodes under their wing, which is a great sign of

faith for Anime fans very rarely get the rug pulled from under them while watching the series. Ashitaka from the studio Ghibli Princess Mononoke. © 1997 - GND Lots of anime series and movies are visually stunning. Studio Ghibli movies such as Spirited Away and Princess Mononoke are excellent examples of amazing animation quality and character designs with background work that can be decorated and hung in an art gallery. Indeed, many animation cells, backgrounds and production projects will, in fact, be respected by the gallery's artists and curators, and quite often you can see touring art exhibitions featuring anime exclusively. The death of Optimus Prime in the movie Transformers. While there are exceptions, such as the death of Bambi's mother and Simba's father in Bambi and the Lion King respectively, for the most part the characters don't actually die in Western animation, and when they do it's almost always an auxiliary character rather than the main character. In the anime, all bets are off. The original 80s Transformers animated film was a massacre that saw the death of almost a whole generation of characters including the iconic Optimus Prime. Characters die so often in Sailor Moon that it actually became a plot point as the series progressed and more characters pass during the neon Genesis Evangelion and attack on Titan than during Game of Thrones' infamous Red Wedding. No one is safe in an anime series or movie (well, maybe Pikachu and Doraemon are), and this makes for a much more rewarding and engaging viewing experience. Studio Ghibli's My Neighbor Totoro. © 1988 Nibariki and G Anime has some of the best thematic songs and background music, regardless of genre. Looking for some catchy tunes for your kids? Pokemon and Sailor Moon have your back. Want to relax and listen to something more complicated? Any of the must-see Studio Ghibli movie soundtracks will be charmed and entertained. Curious about the latest modern JPop hit? Naruto and Bleach will inspire anyone to explore contemporary Japanese music. Anime is a brilliant gateway to Asian music at the same time is a rewarding listening experience in its own right. Many fans admit to watching anime solely for music, and it's easy to see - or rather hear - why. Sure, you can watch Pokemon, Sailor Moon, Naruto and One Piece on DVD or Blu-ray, but did you know that you can also watch these long-term anime series (and hundreds of others!) online for free? There are numerous streaming services now that allow anime fans to watch their favorite series on their computer, tablet and smartphone or stream on TV for free at all. Not only does it make catching up on the series that much easier, but it also provides great opportunities for those who have never watched anime and are interested in giving it a go. Picture: Sean Gladwell/Moment/GettyImages If you believe in reincarnation, then you may believe that you are actually a different form in another life. Reincarnation is the rebirth of the soul in the new body, and this body is not be the same kind as it used to be. Although it's a religious concept, you don't have to be devout to spirituality of reincarnation. It can be as simple as the eerie feeling that you were born at the wrong time. Maybe you feel insanely connected with 1920s or ancient Greece. Or maybe you feel a primal instinct that doesn't feel human, as if you were a lion or a tiger in a past life. Whatever those feelings are, wouldn't it be nice to know what kind of animal it is? Beasts are beautiful creatures that roam the earth and have done so for millions of years. Some animals are brash like a lion. Others are more muted, like otters and sloths. Or maybe something completely different, like a parrot! Do you think one of these, or the other majestic animal, was you in a previous life? Take this quiz to find out! PERSONALITY Answer these questions to learn your animal spirit 5 minute quiz 5 min PERSONALITY What Australian animals are your spirit animals? 5 minute quiz 5 min PERSONALITY What zodiac animals are you? 5 Minute quiz 5 Min PERSONALITY What Majestic Animal Are You, Based on Your Myers-Briggs Type Indicator? 6 min quiz 6 min PERSONALITY What is your Scandinavian animal spirit? 5 min personality 5 min quiz What animal is your soul keeper? 5 minute quiz 5 min TRIVIA Can you guess a Canadian animal from one fact? 6 Min personality 6 Min IS Your Totem Animal Dragon, Unicorn or Mermaid? 5 minute quiz 5 min TRIVIA Animal Facts 101 6 minutes quiz 6 min PERSONALITY Animals quiz 5 minutes quiz 5 min How much do you know about dinosaurs?
